

I had thought that I would never pay for radio to hear programming or entertainment. But when XM Radio came along I forever changed my mind. You see my husband is just one of this nations Professional truck drivers and he deserve to have contact in someway with others. The satellite radio does that for him. He can have talk radio and upto date news, traffic, and weather anytime he want, where ever he wants. How can you people think of limitting that option for him or any others person willing to put hard earned money into the best thing on the airways today. If he had to try and get local radio while he was driving down the road he would be stopping every few miles to tune one in and that is if you could even find one. NO Leave The New Kid on the Block alone. If you want to bitch about something clean up the CB radio talk!!!!
